Adidas US Sales

Part 1 — Overall KPIs

1. Overall Sales Information

Find the following:

- Total sales
- Total units sold
- Total number of transactions
- Average sales per transaction
- Average units sold per transaction
- Total operating profit

2. Profit Information

Find:

- Average operating profit per transaction
- Overall operating profit percentage

3. Retailer Sales

For each retailer, find:

- Total sales
- Total units sold
- Total operating profit

Show the retailer with the highest sales first.

4. Product Sales

For each product, find:

- Total sales
- Total units sold

Show the products from highest sales to lowest sales.

Part 2 — Business Analysis

5. Region Sales

For each region, find:

- Total sales
- Total units sold
- Total operating profit

Find the region with the highest total sales.

6. Retailer Profit

For each retailer, find:

- Total sales
- Total operating profit
- Average operating profit per transaction

Show the retailer with the highest operating profit first.

7. Sales Method Analysis

For each sales method (Online, Outlet, and In-store), find:

- Total transactions
- Total sales
- Total units sold
- Average sales per transaction
- Total operating profit

8. Product and Sales Method

Find the total sales for each product under

each sales method. For example, find the

sales of each product through:

- Online
- Outlet
- In-store

9. Top 5 States

Find the **top 5 states based on**

total sales. Show:

- State
- Total sales
- Total units sold
- Total operating profit

10. Top 5 Cities

Find the **top 5 cities based on total**

operating profit. Show:

- City
- Total sales
- Total operating profit
- Total units sold

Part 3 — Date Analysis

11. Yearly Sales

Find the following for each year:

- Total sales
- Total units sold
- Total operating profit
- Total transactions

12. Monthly Sales

Find the total sales for

each month. Show:

- Month name
- Total sales

Show the month with the highest sales first.

13. Year and Month Sales

Find the following for each year and month:

- Total sales
- Total units sold
- Total operating profit

Show the results in year and month order.

14. Sales by Day

Find the following for each day of the week:

- Total transactions
- Total sales

Find the day with the highest sales.

Part 4 — Data Changes and New Columns

15. Create Sales Category

Create a new column called sales_category. Use the following rules:

- Sales of 20,000 or more → **High Sales**
- Sales from 10,000 to less than 20,000 → **Medium Sales**
- Sales below 10,000 → **Low Sales**

16. Create Profit Category

Create a new column called profit_category. Use the following rules:

- Operating profit of 1,000 or more → **High Profit**
- Operating profit from 500 to less than 1,000 → **Medium Profit**
- Operating profit below 500 → **Low Profit**

After creating the column, find the **number of transactions in each profit category**.

17. Change the Table

Make the following changes to the table:

1. Rename total_sales to sales_amount.
2. Add a new column called sales_year.
3. Fill sales_year with the year from invoice_date.
4. Display the final table structure.

Part 5 — Advanced Business Analysis

18. Best Retailer in Each Region

Find the retailer with the **highest total sales**

in each region. Show:

- Region
- Retailer
- Total sales

19. Product Rank for Each Retailer

For each retailer, rank the products based on

their total sales. Show:

- Retailer
- Product
- Total sales
- Product rank

The product with the highest sales should have **rank 1**
